Warning: Myth Alert!

You've been really low for months; are you okay?

**It's just the
'Baby Blues' –
there's nothing
I can do...**

Let's Bust 3 Baby Blues Myths

Myth 1: Baby Blues can persist long after birth.

Fact: Whilst unpleasant, the Baby Blues that accompany postpartum hormone changes are a normal part of life. In 80% of women they resolve within 14 days.

Myth 2: The Baby Blues need to be treated.

Fact: Whilst feeling awful at the time, Baby Blues don't need treatment unless your mood feels uncontrollable, or you're not sleeping - which for some women may be a sign of something worse.

Myth 3: They always go away by themselves.

Fact: In most cases Baby Blues resolve within 14 days with no need for treatment. If symptoms do persist beyond 14 days, call us for a chat; it could be something more serious and early intervention can help prevent escalation.

A white, ornate sign with a black border and a decorative top, mounted on a silver pole. The sign is set against a dark blue background with a gold horizontal band at the top. Various Jewish items are scattered around the sign: a red kippah with 'Naftali' in gold script on the left, a silver Torah scroll on the top right, a black kippah with a colorful band on the right, a white prayer shawl on the bottom left, and a folded striped prayer shawl on the bottom right.

Ladies, we are delighted to invite you to another fascinating afternoon

On Tuesday 8th February at 2.30pm

SUDDENLY JEWISH

*with
Barbara Kessel*

What does it feel like to wake up one day and find out you are not who you thought you were?

More specifically, what does it feel like to find out you are Jewish when all your life you thought otherwise? Join us and hear Barbara , author of ***SUDDENLY JEWISH*** , who has interviewed over 160 people who have faced that shocking revelation.

Barbara Kessel was Director of Administration at the New York Board of Jewish Education for 25 years. Her freelance work has appeared in the NY Times and many other venues.
