I've felt so hopeless and sad for months. Everything is such a struggle. Why aren't I happy?

Let's Talk About Depression

Perinatal depression causes 10 – 15% of mothers intense sadness, hopelessness, and in severe cases problems caring for themselves or their baby.

Often, needless guilt means they ignore it, hoping it will pass; that they'll 'get over it'. Months or years of untreated depression can follow. But, with the right help, most make a full recovery.

Motherhood should be a joy, so Menucha is here to provide understanding, non-judgmental advice, specialised therapy services, and referrals. If we can help, let's talk.

INNOVATION MADE SAFER™

'Shocking' News!

When 'Rabbi B' brought his working hotplate to MadeSafer for a safety check, we found the plug was fitted with a 13 amp fuse, as opposed to a 5 amp fuse that the British safety standards requires.

A fuse is an important safety feature in every appliance, that breaks the circuit in a fault condition. The fuse is a small wire that melts if too much current flows, thus cutting off the electricity to the appliance.

A fuse installed with a rating too high for the appliance will enable much more electrical current to flow after a fault, causing overheating and risk of fire and electric shock.

A fuse is inexpensive and can be easily changed in a few minutes. Feel free to call us for advice.
