The Voice of NW London

**WOODHILL
GARAGE** LONDON LTD
SPECIALISTS IN JAPANESE CARS

Below are just Some of our most basic car safety summer checks which we check out as standard on any service carried at woodhillgaragelondon.

1. Wipers

If your wipers are not cleaning the window effectively in the rain or your jets are not squirting the washer fluid with power it can be extremely difficult to see what's ahead of you.

2. headlights/brake lights

Make sure they are working!

Check that they're not covered with dirt which affects the light output dramatically, just think about that long everlasting tummy churning windy country roads that one can find oneself on mid country pitch black, you need all the light power you have.

3. Tyres/air pressure

If your tyres are worn or not at the correct pressure the grip is not as good as it should be (among other things) especially with a fully loaded car, it needs the maximum grip it can get, it could also lead to a blowout from being too worn

4. Brakes

Don't wait until you hear the scratching scraping sound every time you brake by then it is too late.

5. Coolant

Must be checked before a long drive, simply said if there is no coolant in the engine it can overheat. As a general rule if you have to keep on filling up engine coolant there could be a leak or a potential worse issue.

Last but not least something that I can not stress enough is do yourself and family a favour.

Get covered by a decent recovery company (AA Greenflag Rac etc make sure you have Europe cover if applicable) it really does not cost a lot and can potentially save you £1000'sss of pounds!!!!

RECOVERY RECOVERY RECOVERY!!!!!!!
