BUSINESS PLANS

- Management accounts
- Robust business plans

- Support with applications for bank loans, charity grants and investments

We worked with Shimon writing up a business plan for our organisation to take to the statutory authorities and funders. At all times he was pleasant, efficient, was available at times to suit, and made it his business to understand the work we do, where we are and what we want to achieve. He is extremely astute and good at what he does, and we really enjoyed working with him. It helped us plan going forward and we have no hesitation in highly recommending him

Let's Talk About **Psychosis**

Postpartum Psychosis is serious but *rare* (affecting just 1-2 in 1,000 births). It usually starts quite suddenly, within a few weeks after birth. Symptoms include rapid mood swings – from being elated to severely depressed – and being confused, unable to sleep or concentrate.

Psychosis also involves delusions or hallucinations. Delusions are strong beliefs that others don't share, for example thinking you have special powers, have Divine experiences, or that someone is following, trying to control or harm you. Hallucinations are experiences such as hearing voices or seeing things that can't be sensed by others.

It's important to seek help as soon as possible, and with the right support, most people fully recover. Menucha is here to help; let's talk.
